New Order Processing Software Arrives for the Macintosh

Litchfield, CT -- May 17, 2005 -- Sawblade Software is pleased to announce Order Tracker, software that allows your company to maintain up-to-date sales records, expense totals, and product listings. Perfect for small Internet and mail order businesses, Order Tracker can store thousands of entries in an easily accessible company database file. Sawblade Software developed Order Tracker to maintain its own sales records, as well as to track business expenses, print mailing labels, and streamline the process of completing taxes. Order Tracker's successful deployment within Sawblade Software ensures that others will benefit from this feature-rich yet easy to use application.

Order Tracker version 1.1 is available now for US$59.00.
